November 03, 2025

Dear Hiring Committee,

I am a dedicated Cloud and Software professional with hands-on experience in designing, developing, and deploying scalable IT solutions across both academic and enterprise environments. My background combines technical depth with practical implementation — from developing full-stack applications using React, Spring Boot, and AWS services to supporting infrastructure and automation initiatives within large organizations.

Over the past few years, I've built and maintained projects that showcase my skills in cloud architecture (AWS EC2, S3, RDS, Lambda), software development (Java, Python, .NET, JavaScript), and DevOps practices (CI/CD, monitoring, and Infrastructure as Code). My work as an Infrastructure Analyst and Software Tutor has strengthened my ability to translate complex technical problems into efficient, reliable solutions while collaborating across teams to achieve project goals.

I am passionate about innovation, learning, and solving real-world challenges through technology. Whether optimizing a cloud environment, improving a system's reliability, or developing user-centered applications, I approach every task with curiosity, precision, and commitment to excellence.

Thank you for reviewing my portfolio. I look forward to contributing my expertise to your organization and continuing to grow as a Cloud and Software Engineer.

Sincerely,

Fuwad Oladega
Cloud & Software Developer | IT Infrastructure Analyst
